TESTS	RESULTS	REFERENCE RANGE
T4	2.8	MCG/DL 1.0-4.0
UON WILLEBRANDS ASSAY	112	% 70-100%

This result indicates that the dog is clear of vWD.  
Test performed at Cornell

\*\*\*\*\*

Due to a supplier backorder, we will be unable to perform the FreeT4 by Equilibrium Dialysis. Until reagents become available, we will run the FreeT4 test using the RIA (radioimmunoassay) method.

The RIA method correlates well with the Equilibrium Dialysis method and is used by Michigan State University and other Antech labs.

The normal ranges for the RIA method differ from the Equilibrium Dialysis method, but the normal ranges will be posted on the FreeT4 reports.

Please call 1 888 UET INFO to speak with one of our consulting doctors if you should have any questions about interpretation of the FreeT4 by RIA results.

Dr Rhett Nichols, Dip. ACUIM, Director of Endocrinology  
Dr Scott Moroff, Dip, ACUP, Lab Director
